About

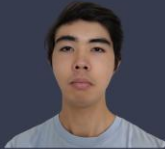

About Me

Hello!

Greetings! I'm Zenki Whiteley, an aspiring junior full-stack developer with a unique journey that spans from the meticulous world of civil design to the hands-on artistry of car detailing.

Hobbies

I have a passion for electronics, tinkering around and designing my own devices, one of which being my very own home made SLAM Lidar scanner. This device fires of near infra-red light to measure distances, inorder to create point clouds of its local environment. This extends into my other interest of digital twins, as I can use these points clouds to create near identical copies of places that I have been. Amongst all the designs and electronics, I also enjoy a plethora of different physical activities, being somewhat of an avid tennis player, playing weekly if I ever get the chance.

Current Position

Car Detailer

Carma - Alexandria NSW
August 2022 to Current As the main sales detailer, I was responsible for preparing both the interior and exterior of cars that had been sold. I organised which cars received specialty processes inorder maximise car output, without compromising on quality. With a keen eye for detail, each car was checked to minimise customer issues and reduce the possibility of returns.

Resume: [HERE](#)

Education

Coder Academy Full Stack Developer Bootcamp
Coder Academy - Sydney
October 2023 to Present **Advanced Diploma in Design**
TAFE Sydney Institute - Ultimo NSW
February 2021 to July 2021 **Diploma in Civil Construction Design in Civil**

Certificate I in IV
TAFE Western Sydney Institute - Wetherill Park NSW
February 2019 to October 2019

Previous Positions

Assistant Art Director

You & Me by the Sea - Short Film - Sydney NSW
2022 to 2022
Car Detailer

Crystal Car Wash - Coogee NSW
2021 to 2022

Assistant Coach
Eastern Suburbs Tennis Club Coogee - Coogee NSW
2019 to 2019

Animal Logic Work Experience
Animal Logic - Sydney NSW
2017 to 2017

My Tech Stack

The tech stack that I will be working towards will be MERN.
This stack includes:
MongoDB: A NoSQL database.
Express: A web framework for APIs.
React: A library used for building the front-end of my projects.
Node.js: A server technology to handle the backend of my projects.
